

## SOLAR HOT WATER SERVICING AND MAINTENANCE

Solar thermal hot water systems are low maintenance systems which should look after themselves and require little maintenance (if installed correctly!). However, there are a few essentials to check in order to ensure the long life expected.

For peace of mind we have introduced our solar servicing and maintenance service carried out by a Kingspan Solar Accredited Installer with 10 yrs solar thermal experience. We can also carry out Kingspan warranty replacement or repairs. Service and repairs on all other makes possible.

Price 160€ TTC\*

### WHAT'S INCLUDED;

- < Cleaning of the solar panel/tubes of dirt and grime
- < Check vacuum seals on panel (replace any tubes under Warranty tubes if applicable)
- < Check system pressure and flow rates
- < Check the system for leaks
- < Check solar fluid degradation (flush and fill chargeable separately)
- < Check temperature sensors and insulation for rodent activity and damage
- < Check overall performance
- < Update service record (provided)

\* up to 60KM distance included, 60-120KM add 25€HT, 120-150KM add 50€HT, above 150KM call for Devis.

We also carry out surveys for Insurance or litigation purposes and can provide a Devis for the repair and replacement of parts.

We are covered by Insurance 'Responsabilité Civile Décennale & Professionnelle' SFS Securities and Financial Solutions Europe Policy No; 1502DERCEL03588 and 150PJASSCF06957
