

SIMPLY GENERATE AND USE YOUR OWN ELECTRICITY TO REDUCE YOUR BILLS PERMANENTLY

“TURN SUNLIGHT INTO POWER” WITH ONE OF OUR PV SYSTEMS SET UP IN ‘SELF USE’ 1KW 2KW 3KW AND MORE

- Quality German manufactured PV panels with outstanding outputs
- Enphase Microinverters and Energy Management System
- Manage your generation and use with our energy monitor
- Fixing systems to suit all roof and ground mounting situations
- KEEP IT SIMPLE - NO NEED FOR COMPLICATED OR EXPENSIVE EDF CONTRACTS

The Basics:

The PV panels generate electricity which the inverter converts to AC current so that it can be used to supply your home. Your appliances use the solar generated power in preference to grid mains. Every unit of electricity you produce and use will lower your electricity bill. You remain grid connected as before for convenience and for ‘topping up’ when your PV cannot provide all of your electrical requirements.

Any over production of electricity that you are not able to use can be ‘captured’ by add on devices. If there is any over production after that it will simply flow back into the grid. An energy monitor is included to monitor in real time the energy you are producing against the energy you are using so you can make the most of your system and savings.

The Advantages:

- Reduce your bills significantly
- Simple set up from day 1
- Investment offset by the improved resale value of your home
- Offset the running costs of a pool or gite
- No need for EDF “raccordement”
- Reduce your homes “energy label”
- Clean, green energy production
- Reduced rates of TVA

In association with

SOLARWORLD & ENPHASE ACCREDITED INSTALLERS

TURN SUNLIGHT INTO POWER

Sunmodule New Generation sleek and lightweight - Monocrystalline panels in black anodized aluminium frame - "Excellent" Solar product award 2013

- German quality manufacturing processes
- 25 year performance guarantee
- 10 year product warranty

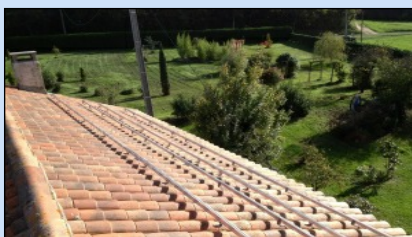

Enphase Microinverters

- Maximise energy production
- Reduce design and installation complexity
- Enhances safety
- Links to 'Enlighten' monitoring and analysis software
- Industry leading 20yr warranty

Energy Management

- Traffic Light energy monitor conveniently located to help you use the solar electricity
- Enlighten monitoring and analysis software records your solar electricity production and usage in real time
- Enables us to log on to check the performance of your system and identify any anomalies

Versatile fixing systems available

- Schletter fixing systems for all roof, ground and wall mounting situations
- Suntub solutions for flat roofs and some ground situations
- Strong and durable aluminium support structures with stainless steel connecting elements

We work with the leading companies in the industry with over 40 years of solar PV experience.

We install to the BRE Codes of Practice and have a customer rating of 'excellent'.

Working towards QualiPV quality rating.

TURN SUNLIGHT INTO POWER

PV installation start to finish in 4 days
