

# MICROPV SOLAR SYSTEM

## FULLY INSTALLED 4 PANEL GROUND MOUNTED SOLAR SYSTEM

Designed specifically for domestic garden applications giving just over a KW of energy from sunrise to sunset.

**Brought to you exclusively by Ecopower**

- LG quality, high output panels - highest spec/value ratio on the market
- Enphase IQ7+ micro-inverters and monitoring system
- Galvanised steel post structure on a simple pad foundation with template provided
- Tilt angle of 10-60 degrees
- Height below 1.8m so avoids Déclaration Préalable submission
- Can be delivered and fully installed in one day (cement pad not included and subject to location)
- One frame holds 4 panels but additional frames can be daisy chained together
- Set up in "autoconsommation" or self use so electricity produced is used to offset bills from day 1
- Battery ready system so batteries can be added if required or in the future
- Immersun compatible so Immersun can be added to start heating water
- Designed specifically for domestic garden applications
- No SURVEY required - just some simple questions and a couple of photographs
